

Name: _____

Cerebellum Crossword Puzzle!

Based on what we learned today about the cerebellum, complete the crossword puzzle below

Created using the Crossword Maker on TheTeachersCorner.net

Across

1. Fissure that divides the anterior and posterior lobes
3. Main function of cerebellum
5. Scientific professional that found the general anatomy of the cerebellum
6. Lobe that is above the posterior lobe
7. Neural pathway connecting cerebellum to the rest of the CNS
9. Fissure that divides the posterior and Flocculonodular lobes

Down

1. Largest lobe in the cerebellum
2. Smallest lobe in the cerebellum
4. How many lobes is the cerebellum divided into?
8. Vertical portion connecting the anterior and posterior lobes

1. Where is the Cerebellum located?

- A. It is located at the back of the brain below the Cerebrum.
- B. It is located below the primary fissure.
- C. It is located in the cranial fossa.
- D. None of the above

2. Which three lobes are part of the Cerebellum?

- A. Temporal, Occipital, Anterior
- B. Anterior, Posterior, Primary Fissure
- C. Flocculonodular, Anterior, Posterior
- D. Frontal, Temporal, Occipital

3. What is the general function of the Cerebellum?

- A. Plays an important role in motor learning.
- B. Helps with balance coordination and speech.
- C. Coordinates muscle groups to carry out a specific function.
- D. All of the above.

4. What is a way you can strengthen the Cerebellum?

- A. Head Injury
- B. Stroke
- C. Sleep
- D. Meditation

5. True or False? The Cerebellum is bigger than the Cerebrum.

- A. True
- B. False

6. True or False? The Cerebellum accounts for 10% of the brain.

- A. True
- B. False

7. Who is the scientist that contributed to the discovery of the Cerebellum?

- A. Thomas Willis
- B. Phineas Gage
- C. Luigi Rolando
- D. Tatsuji Inouye

8. What can happen if the Cerebellum is damaged?

- A. Uncoordinated movement
- B. Slurred Speech
- C. Trouble completing everyday tasks
- D. All of the above
